# The Solution That Combines Comfort and Efficiency

Can you imagine what it would be like to no longer have to prepare your mail by hand? Thanks to Neopost this is now possible as the DS-35 deals with the job for you, enabling you to perform other tasks.

With its compact size and fold-away catch tray, this solution fits any office environment. The DS-35 can be installed on a desk so it is near-at-hand. Its control touch screen makes the DS-35 very convenient and easy to use.

## Commitment to the Environment

The DS-35 carries Neopost's Eco Label, a reflection of Neopost's environmental commitment. Neopost launched the eco signature in 2011 to identify the most efficient and environmentally friendly solutions.

The DS-35 is also compliant with environmental regulations (ErP - stand by and off mode, REACH, ROHS and WEEE).

The label reflects Neopost's commitment to informing customers of the environmental progress that has been made in the last few years.

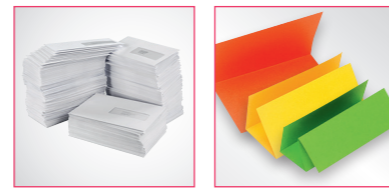

**Energy:** A working year on DS-35 consumes 7 times less energy due to automatic sleep mode and auto-off (0,3W).\*

**Packaging:** The carbon footprint during transport is reduced since the ratio of packaging volume vs DS-35 volume is low.\*\*

\* Compared with our previous model SI30  
\*\* 1.64

## Fully Automated For An Optimal Mail Flow

Perhaps you already have a Neopost franking system. The DS-35 can be connected to your mailing system to automate your entire mail flow.

### A Versatile Workstation to Fulfil Your Needs

The DS-35 can handle a wide range of documents, envelopes and even inserts or business reply envelopes. You can choose between four fold types according to your requirements.

The automatic cascade feed function rules out downtime thus optimizing productivity. The manual feed function allows you to feed up to five sheets for each mailing project, stapled or not.

### Excellent Accessibility Keeps You Up and Running

With only one button to open the machine, there is quick and easy access to all parts of the folding area and paper path.

### Mail Integrity and Accuracy Guaranteed

Neopost's double document control prevents double feeding. Its insensitivity to colored paper and dust ensures complete reliability. The system guarantees that you will always send the right document to the right recipient.

# The Convenient Solution for Folding and Inserting Your Mail

### A Perfect Combination of Convenience and Ease of Use

The DS-35 is fully controlled from its new user interface, a modern color touch screen with only two buttons. No more need for skilled operators - anyone can use it.

Just load your documents and envelopes, and let the software guide you through adjusting the settings. Its 15-job memory enables you to store the settings for all your regular mail runs, allowing instant recall.

### The Ideal Assistant in Any Office Environment

Combining ease of use and flexibility to save time and improve efficiency, the DS-35 is compact and silent enough to suit any office environment.

The space taken up by this solution is optimized even further thanks to its fold-away catch tray.
