A Dependable All-in-One Mail Management Solution

The DS-63 is able to quickly and automatically process all standard mail management services as well as direct marketing applications.

This is achieved thanks to an easy-to-use graphic touch screen and highly developed ergonomics. Designed on the basis of a tried and tested platform, it is 100% reliable. Your mail will be processed on time. Combined with our software mail management solutions featuring grouping, sorting and splitting capabilities, the DS-63 will contribute to optimize your mail flow and therefore contribute to significant cost savings.

Neopost Cares About the Environment

Neopost aims to use materials in their products that have a high potential for reuse or recycling. The recyclability at the end-of-life of a DS-63 is at least 85% (in weight).

Neopost also aims to reduce the carbon footprint of its activities, for example by reducing the cost of air transportation. The DS-63 takes part in a program that uses shipment by sea rather than by air for overseas transport; this easily reduces the carbon footprint by at least 80%.
Maximum Flexibility to Develop Your Activity

The DS-63 can be configured in several different ways and can be adapted to meet your every need. This versatility will also allow you to automate your mail marketing campaigns targeted at customers and prospects to further develop your business activity.

Integrated Process

Combined with Neopost's OMS software solutions, the DS-63 will be able to achieve cost savings for you by automizing variable pages for document preparation and thus avoiding manual handling and errors.

With our Insert'N Frank solution, automate your total mail flow by connecting the DS-63 to a Neopost franking system.

The FlexFeed function allows you to process all document formats (inserts, reply forms and return envelopes).

Additionally, the "daily mail" function allows you to process mail that may contain a variable number of documents depending on the recipient (for example, invoices).

Enhanced Ease of Use

The DS-63 is equipped with a graphic touch screen that makes it easy-to-use and allows applications stored in the memory to be accessed quickly.

A step-by-step wizard (Load'n Go) allows all users to define settings for their applications and store them quickly in the memory.
The DS-63 is a model of ergonomic efficiency and as such is well suited to automated processing. Additionally, its compact size and low noise level make it suitable for use in every working environment.
Maximum Security

The DS-63 is also able to automate the processing of mail that contains a variable number of documents such as invoices. The OMR scanner system allows you to automate the required number of documents to be inserted for each recipient and it stops the machine should the contents of a mail piece be incorrect. The DS-63 guarantees the integrity of your mail whatever the circumstances.

Thanks to its PowerFold system, documents can be folded together for a professional-looking result. This feature also helps to prevent documents to be included in envelopes from being lost or overlooked. The DS-63 can neatly fold together up to five documents and runs silently.
